

Course: IPAF **MM** MEWPS for Managers

Description: This one day course is designed to instruct supervisors and managers how to prepare for and safely co-ordinate various types of MEWPs within their control.

Objectives: This course will enable your managers and supervisors to develop their awareness of:

- Current legislation
- Different types and classifications of MEWPs
- The importance of correct machine selection
- The importance of correct PPE selection for their MEWP operator(s)
- The safe use and operation of MEWPs
- Planning and maintenance considerations

They will also be able to identify misuse and abuse of MEWPs...

PPE required: None required

Length of course: 1 day

Location: Hemel Hempstead, Birmingham, or Manchester depots. Training courses can be carried out on site but please contact us for facilities and equipment required.
